

Future Supreme Court

-Bush v Gore was an intellectual disgrace. I won't have amnthing
to do w/ this REpublican reprise! The answer is no! I won't
have future law sudents laughing at me. Let someone else
fix elections? I'm a Supreme Court Justice!

-You through? A few skeletons in woods in marshes tied to you--
figurative speaking of course. Your examining committes
never came close to discovering 'em. You thinkk that was
an acciddent? You owe.

-You blackmailig me, is that it?

-Yeah. And the chaser for that potent-enough booze was that cirlce
jerk with you and all the fags.

-I left that party before...

-Just hyour word. You cna't prove it.

-Christ! You're criminals! Criminals!

-Uh huh. Well fall into line, Capo.
